

TOP TONNA

The ultimate in paddock bulk feeding solution

The Top Tonna is a large, durable, hot dipped galvanised steel covered feeder with the capability of holding one tonne of feed in the bin. This allows for farmers to distribute approximately a one-month supply of supplement for 100 head of stock at a time. With a large roof to cover the bin, this strong and sturdy steel bin is protected from the elements and potential damage from your stock. The lid is able to be tilted for easy access, and the bin also features a built-in, easy-pour spike for bulka bags. The Top Tonna can easily be moved with a forklift from any of the four sides.

Benefits of the Top Tonna:

- Does not need to be filled as regularly as a standard cattle feeder
- Specifically designed for feeding large number of cattle
- Approx. one-month supply of supplement for 100 head of stock
- High durability - made from galvanised steel
- Lasts up to 30 years under heavy load
- Ideal for 1 tonne bulka bags or for use with the Ration Runner

RATION RUNNER

The ultimate mobile bulk feed delivery solution

Smarter Rural is proud to introduce the latest product to the feeding systems range. The Ration Runner, manufactured by Smarter Rural and exclusively distributed by Top Country, is a large mobile bulk delivery system that allows for producers to distribute licks and rations into their cattle feeders such as the Top Feeda and Top Tonna from the back of a truck or trailer. It is a cost-effective way of delivering medium to large amounts of supplement products to larger numbers of feed out points.

The Ration Runner positively addresses the effective and efficient delivery of bulk supplements, and completely abolishes the need for the manual handling of all bagged products and the environmental impact of those bags. Currently with an 8-tonne capacity, the Ration Runner 8 has been in development and testing for several years. There are several other Ration Runner sizes now in development.

Benefits of the Ration Runner:

- Simple key start and convenient remote control
- It features a fully supported, single person, single hand operation with swing out auger
- Quick, cost-effective and accurate delivery of Product
- Load cells (scales) with an indicator head to accurately measure product to feed out points
- Quick unloading, with 500 kgs unloaded in just 49 seconds!
- Average cost to deliver supplement using the Ration Runner 8 is just 94 cents per head per day
